

BENZALDEHYDE (ex-Cassia Oil)

Olfactive Description

Aldehydic, fruity, Bitter Almond, Cherry

Olfactive Family

Aldehydic

Usage Recommendations

In Fragrance, this strong typical note is used in low to very low dosage to give a bitter effect in the top note of several fragrances (male and female) it is used in fine perfumery and cosmetic applications.

In flavour, it gives not only a typical cherry effect but also a natural impact on all fruity flavours.
